Profile

Frontend engineer with 5+ years of experience building scalable, high-performance web applications. Founding engineer at an AI startup, leading frontend development and shipping core product features from zero-to-one. Strong focus on system design, performance, and product-driven engineering in fast-paced environments.

Skills

Languages: JavaScript, TypeScript, HTML, CSS, GraphQL, Python, Swift, Java, C#

Frameworks & Libraries: React, Redux, Redux Toolkit (RTK Query), Apollo Client, Node.js, Tailwind CSS, Radix UI, Framer Motion, Recharts

Tools & Practices: WebRTC (Daily.co), WebSockets (Socket.io), Jest, Auth0, REST, Performance Optimization

Spoken Languages: English (Fluent), Arabic (Native)

Experience

Founding Engineer, Frontend

FullyRamped, San Francisco (Remote)

Apr 2024 – Present

- Leading frontend development for an AI-powered sales training and role-play platform, owning architecture and core product decisions.
- Built the web application from the ground up using React and TypeScript in a zero-to-one environment.
- Designed scalable state management and data-fetching architecture using RTK Query and Redux Persist.
- Integrated real-time video and audio communication using Daily.co (WebRTC) to power interactive AI-driven sales simulations.
- Developed and maintained a reusable component system using Tailwind CSS, Radix UI, and DaisyUI, improving development speed and UI consistency.
- Partnered closely with founders, design, and backend teams to shape product direction and deliver high-impact features.

Senior Software Engineer, Frontend

Skiff (acquired by Notion) via Nodogoro

Aug 2022 – Apr 2024

- Founding engineer across Skiff Mail, Calendar, Drive, and Pages, an end-to-end encrypted productivity suite, working within a complex client-side encryption architecture.
- Built and scaled core product features across web and mobile using React, Redux, and CSS.
- Led the engineering revamp and open-source release of **Skiff UI**, a React component library (420+ GitHub stars), owning implementation and release.
- Led frontend development across key product areas, driving architecture decisions and resolving performance bottlenecks to improve application responsiveness.
- Collaborated closely with design and backend teams to deliver high-quality user experiences.

Software Engineer, Full-Stack

Forest Park Group via Nodogoro

Aug 2020 – Jul 2022

- Developed full-stack features for LoanOS, a loan digitization platform leveraging blockchain-based smart contracts to automate lending workflows.
- Built responsive user interfaces with React, Redux, HTML, and CSS, and implemented backend services in Node.js.
- Authored Rust-based smart contracts to handle on-chain loan logic, integrating them with the web application through typed API contracts.

Education

BSc Computer Science & Engineering

German University in Cairo

2015 – 2020

GPA: 1.09 (A equivalent on the German 1.0–5.0 scale, where 1.0 is highest)
